Using `mandi` version v3.0.0m dated 2021-05-28

## List of GlowScript Programs

1	A Placeholder Program . . . . .	3
---	---------------------------------	---

## List of Figures

1	This problem's diagram. . . . .	2
---	---------------------------------	---

PROBLEM TITLE HERE

Every document must have only ONE problem. You can have as many problem parts as you need. Each part will need a `physicssolution` environment only if extended mathematical content is necessary.

- (a) blah blah blah
- A solution not requiring multiple steps can go here. Delete the `physicssolution` block if you don't need it.

$$PUTYOURSOLUTIONSTEPHERE$$

(1)

- (b) blah blah blah
- A solution not requiring multiple steps can go here. Delete the `physicssolution` block if you don't need it.

(2)

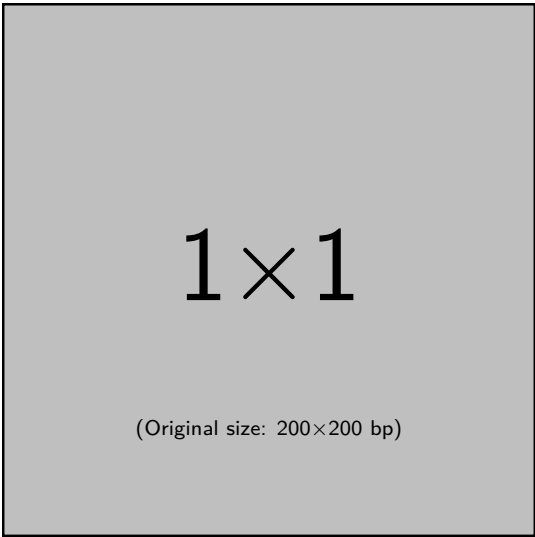

Figure 1: This problem’s diagram.

Figure 1 is nice. It’s captioned This problem’s diagram and is on page 2.

### GlowScript Program 1: A Placeholder Program

```
1 GlowScript 3.0 VPython
2 # This is just a placeholder.
3 # It is part of the mandi documentation.
4
5 sphere()
```

GlowScript program 1 is nice. It's called **A Placeholder Program** and is on page 3.
